## SHANDONG LANSI ALUMINUM TECHNOLOGY CO.,LTD.

Add: Kehang Road, East District Office, High-Tech Zone, Jinan, Shandong, China

Mob&Wechat: +86 15318801428

Email: nancy@sdlsap.com

Main Product: Aluminum Profiles, Aluminum Extrusion.

## Craftsmanship quality Pursuing Excellence

One-Stop Service in Aluminum Profile

# COMPANY PROFILE

Shandong Lansi Aluminum Technology Co. Ltd. is a comprehensive enterprise engaged in the design, production and sales of industrial aluminum profiles. Its products and services cover mold design, industrial aluminum profile extrusion, various oxidation treatments on the surface, aluminum products deep processing, industrial aluminum profile framework and assembly line profile development and installation. Since its establishment, the company has been focusing on extrusion industrial aluminum profiles and deep processing, always adhering to the enterprise tenet of "integrity and innovation", taking "quality and service" as the foundation of business, relying on strong production and manufacturing support, and providing customers with one-stop service in the aluminum profile field.

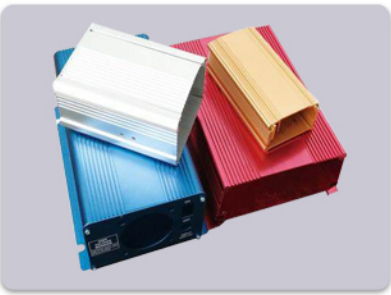

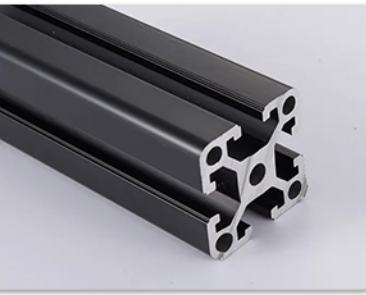

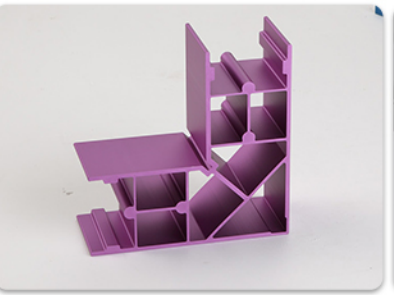

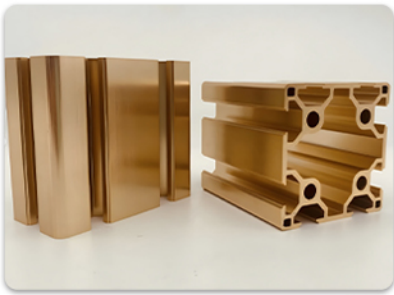

We sincerely welcome new and old customers at home and abroad to come to negotiate and cooperate, and are willing to work with you to develop together for a better tomorrow!

# FACTORY PROFILE

Extrusion production

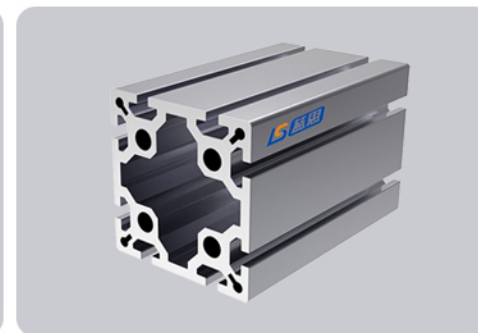

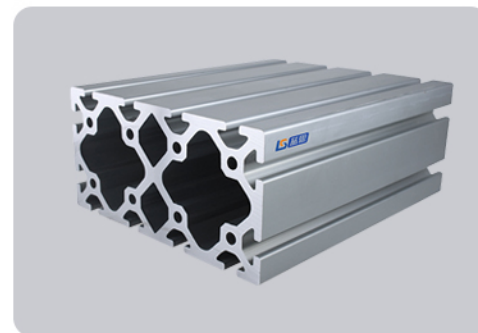

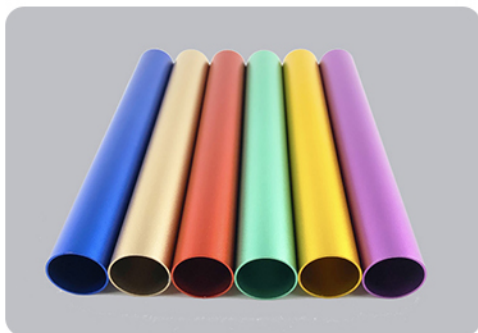

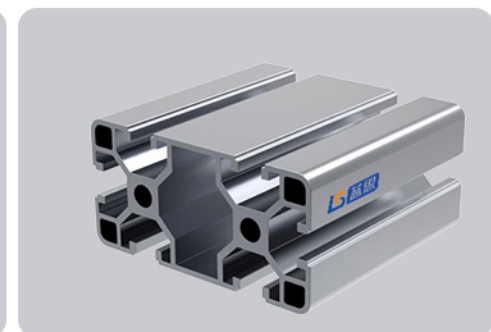

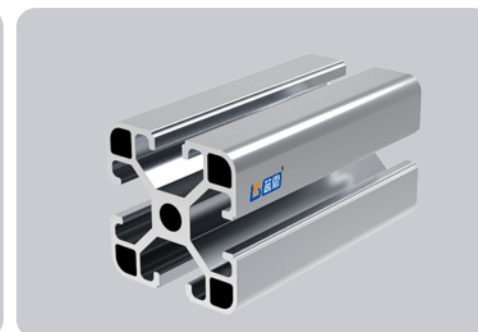

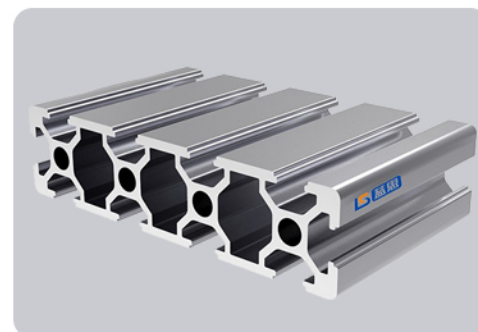

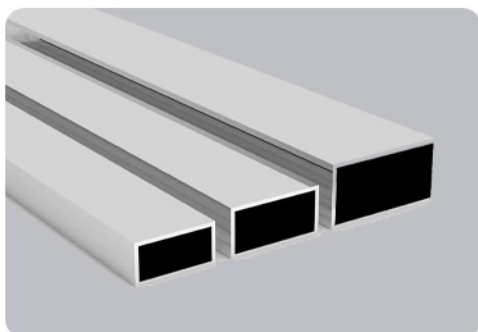

# INDUSTRIAL ALUMINUM PROFILE

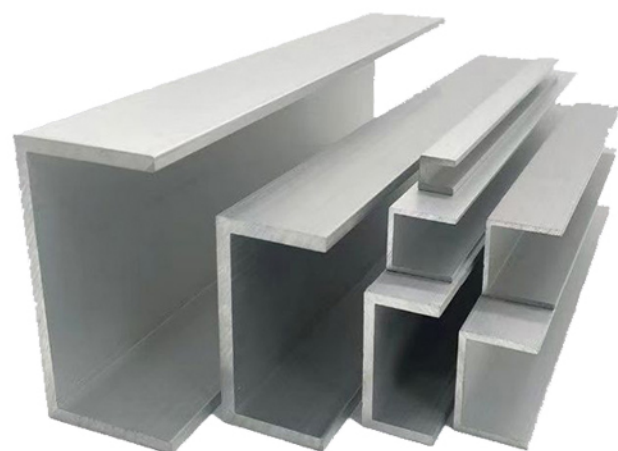

● ALUMINUM PIPE

● T SLOT ALUMINUM  
PROFILE

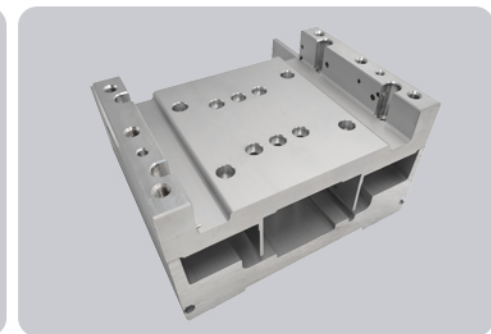

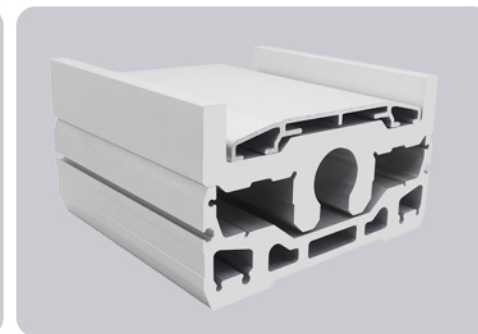

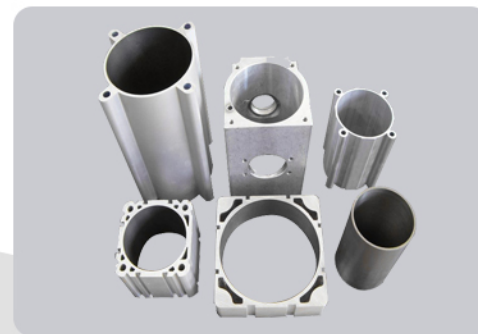

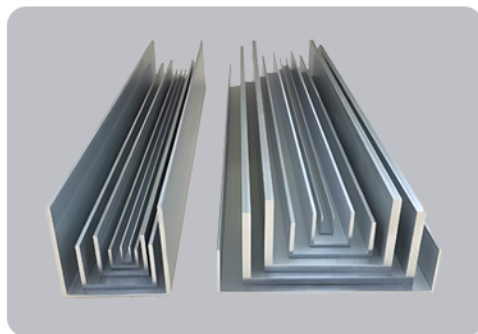

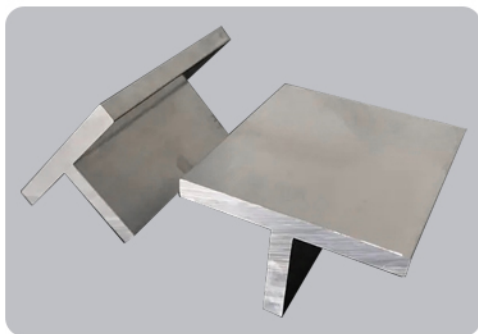

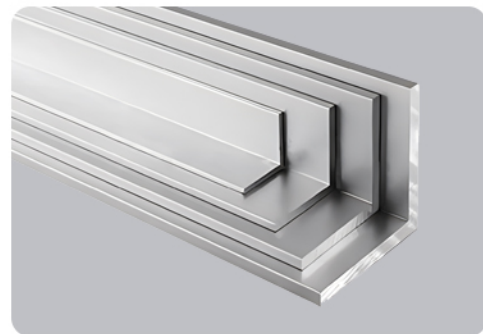

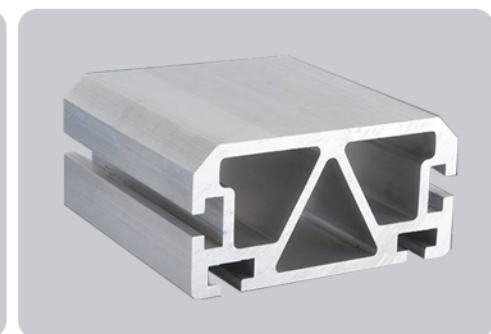

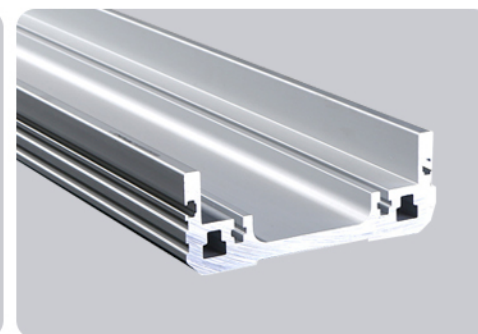

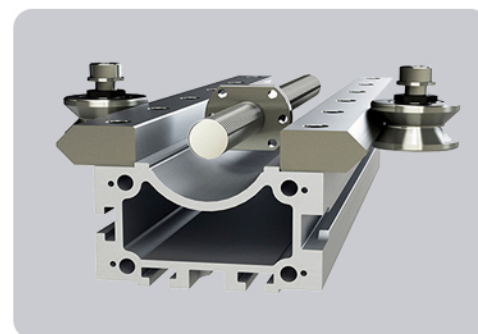

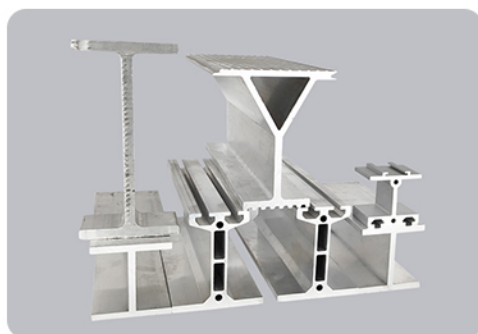

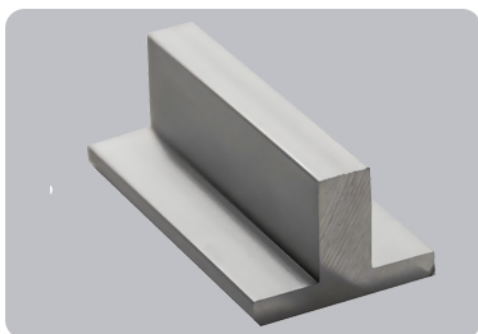

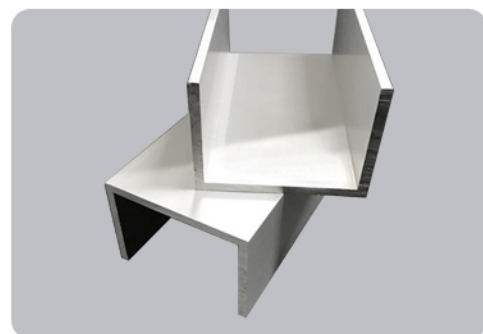

● STANDARD TYPE  
ALUMINUM PROFILE

● INDUSTRIAL MACHINERY  
EQUIPMENT PROFILE

There are many types of industry aluminum profiles, wide selection of automation equipment for different sizes and load-bearing requirements, some can also use different parts to combine into the framework of automation equipment, without welding, grinding, simple, environmental protection, beautiful and generous.

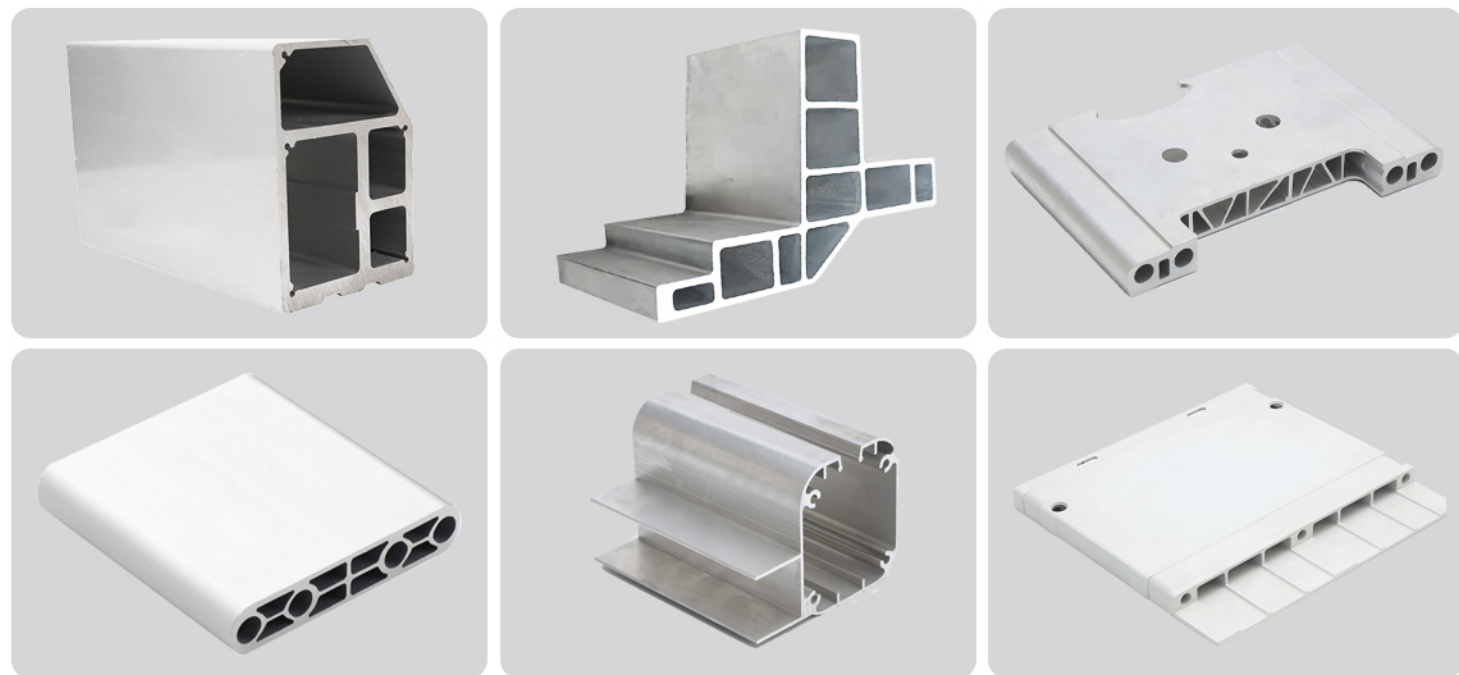

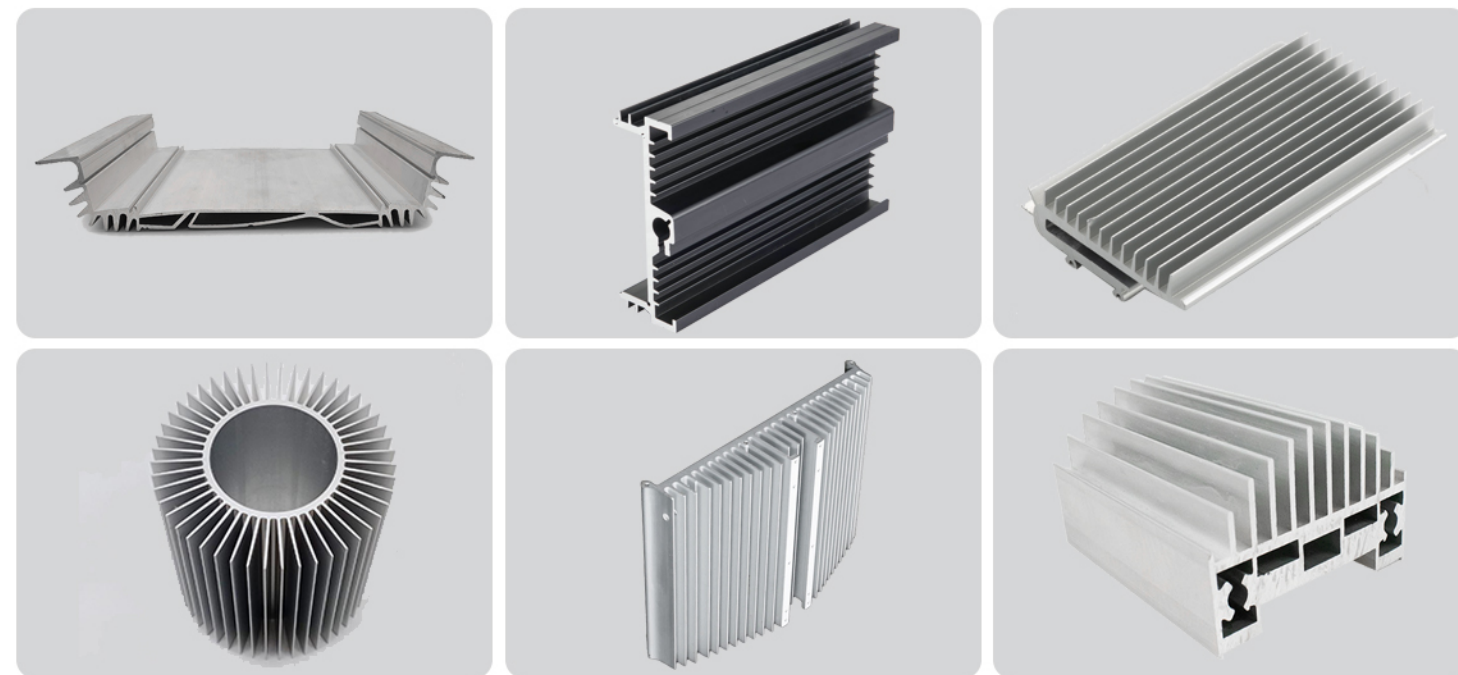

## NEW ENERGY AUTOMOBILE ALUMINUM PROFILE

Because of its light weight and good rigidity, aluminum profiles are widely used in various parts of automobiles, and have attracted much attention as one of the effective means of automobile lightweight. Main applications: battery shell, anti-collision beam, instrument panel bracket, body structure, guide rail, luggage rack and other components with the same section and complex shape.

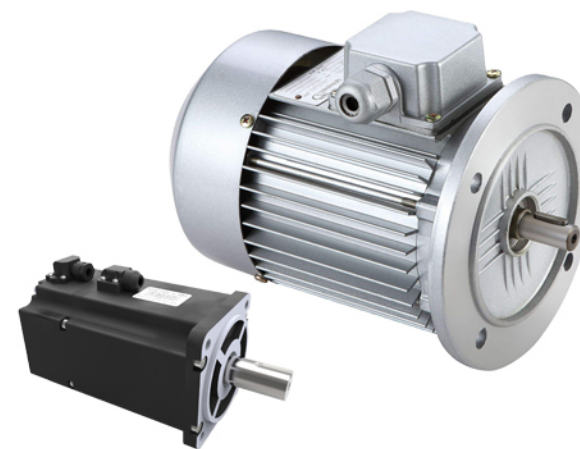

## HEAT SINK ALUMINUM PROFILE

The aluminum radiator has the characteristics of beautiful appearance, light weight, good heat dissipation performance and good energy saving effect. The processed aluminum radiator has excellent corrosion resistance and wear resistance after surface treatment. The new silver aluminum radiator profile is mainly used in LED lighting, motor equipment and other fields.

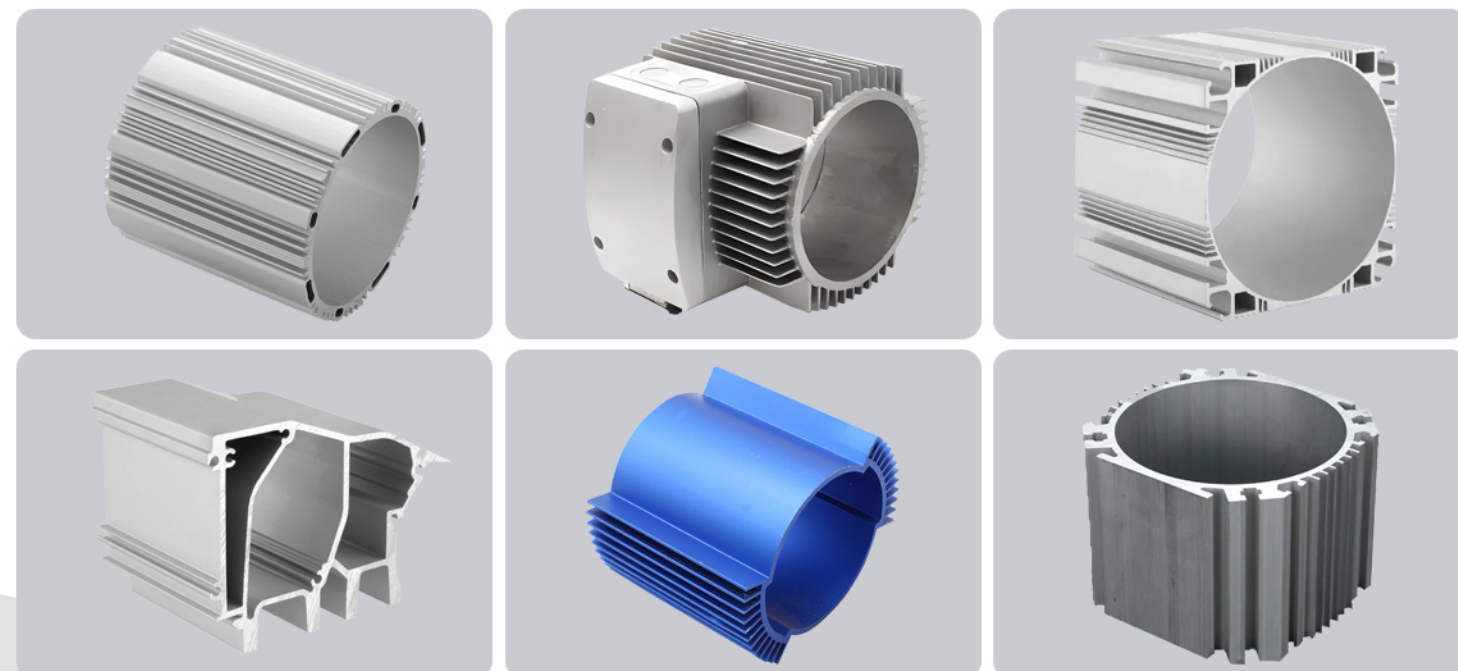

## MEDICAL EQUIPMENTS ALUMINUM PROFILE

Due to the high hardness of aluminum alloy profiles, easy processing, corrosion resistance and other excellent characteristics, in the field of medical and health is also more and more, the application range is also more and more wide, new silver aluminum industrial profiles can be used in medical device shell, medical device accessories, etc. (such as: rescue and nursing equipment and facilities, fitness equipment and equipment, medical equipment and instrumentation, etc.).

## ALUMINIUM ENCLOSURES

Aluminum alloy motor shell has the characteristics of good heat dissipation, strong plasticity, high precision, light weight, low vibration, low noise, rust prevention, easy processing and so on.

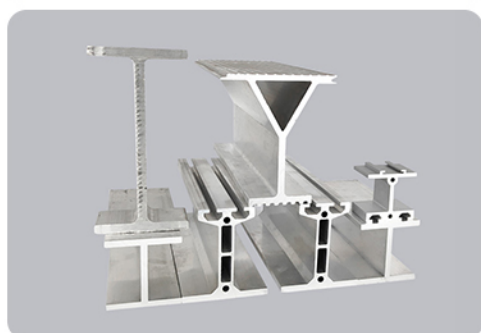

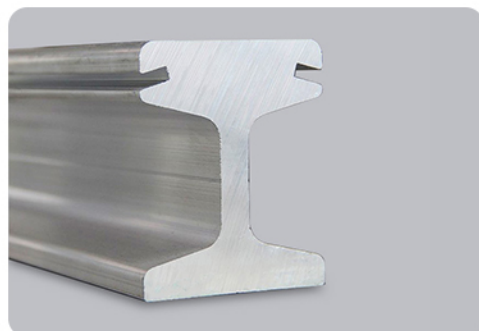

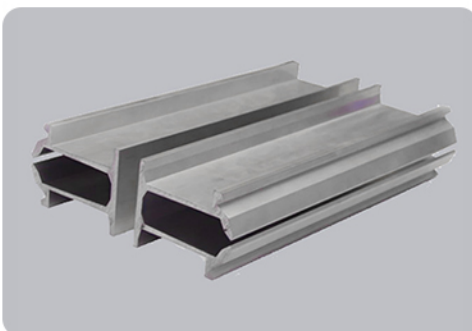

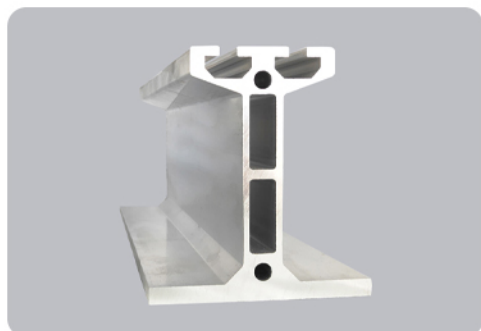

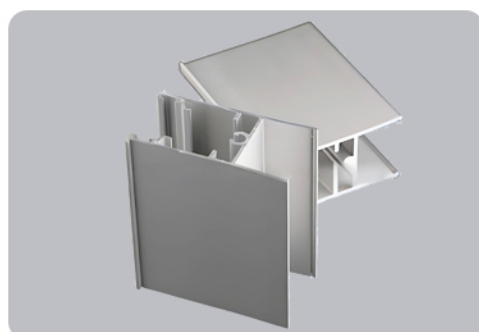

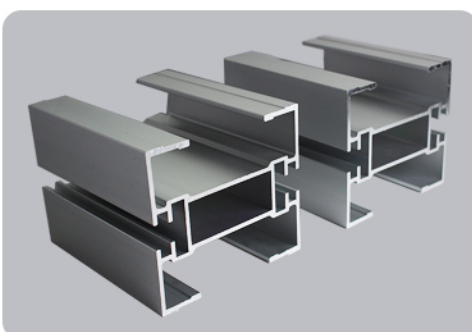

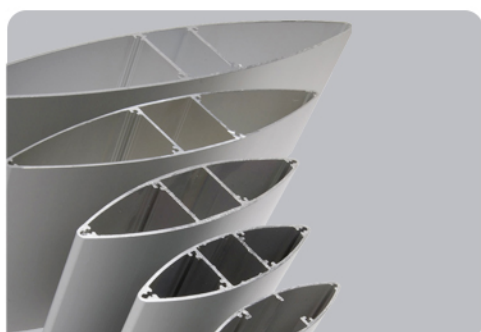

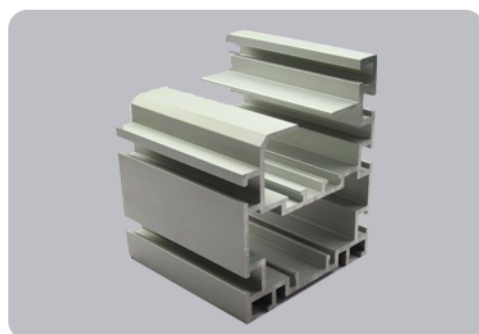

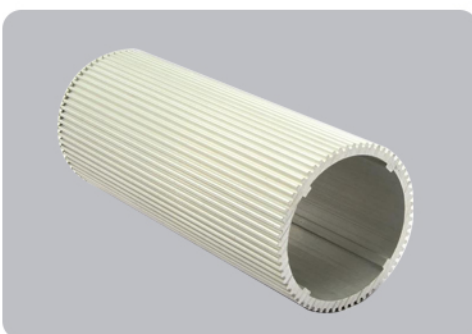

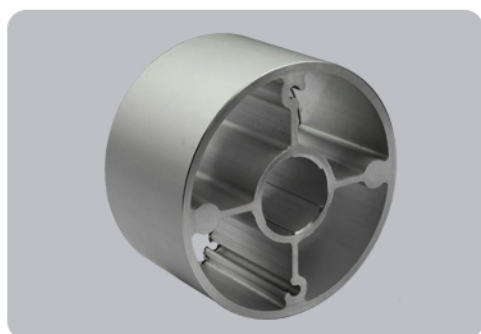

## ● RAIL TRANSPORTATION ALUMINUM PROFILES

The lightweight structure of rail transit vehicles, especially the lightweight of high-speed bullet trains, subway and light rail trains, is the development trend of rail transit, and a large number of aluminum alloy materials can meet the needs of lightweight vehicles to the greatest extent.

## ● CUSTOM ALUMINUM PROFILE

Aluminum profiles have a wide range of applications, we can customize according to customer drawings. And provide processing services
